clean water

The CLEAN WATER line is enriched by the integrated **REVERSE OSMOSIS SYSTEM (R.O.S.)**, which allows to obtain glasses and dishes always bright and free of streaks. Moreover it keeps the hydraulic circuits and washing chamber clean by eliminating the limestone, it reduces amounts of detergent and ensures the high efficiency of the heating elements, for a drastic reduction of maintenance interventions and, therefore, significant cost savings.

The line ranges from the hood to the glasswashers, which can be supplied with the **STEAM RECOVERY SYSTEM (S.R.S.)**, in order to reduce environmental impact by lowering energy consumption and completely eliminating steam. Each machine is built according to criteria of robustness, hygiene and aesthetic impact.

luxury

The machines of the line LUXURY meet the most specific market demands in terms of energy savings, build quality and versatility. The line ranges from the hood to the glasswashers, which can be supplied with the **STEAM RECOVERY SYSTEM (S.R.S.)**, which allows the total elimination of the steam. The whole series has molded chambers characterized by large radii to facilitate the cleanability, ergonomic handles designed to reduce the operator effort, ultimate and user-friendly electronic control. The washing and rinsing arms, as well as the entire dishwasher, are made of stainless steel 304.

reverse osmosis system

4

Detergent's reduction of 90%*- Rinse aid's reduction of 90%*- complete elimination of the use of descaling compounds - Long-lasting efficiency of the heating elements - Reduction of the maintenance's costs - Reduction of the overall dimensions due to the integration of the reverse osmosis system in the machine.

*with detergents recommended by WALO PROFESSIONAL

Thanks to the **REVERSE OSMOSIS SYSTEM (R.O.S.)**, the glasses are perfect without blemishes or stains due to water quality. Please note that the osmosis system is integrated in the machine, thus eliminating the problem of space in premises prevalently occupied by the furniture or rooms dedicated to other services. The integrated reverse osmosis system also allows a reduced consumption of detergent compared to common water treatment systems and drastically reduces the technical assistance, maintaining the heating elements always clean.

The reduced consumption of electric energy, detergents and hot water provides all products of the Clean Water and Luxury range with the ecoplus certification.

Eco-friendly high technological performances.

The **STEAM RECOVERY SYSTEM (S.R.S.)** allows the total elimination of steam at the end of the wash cycle keeps the workplace healthy and prevents the operator from continuously breathing the substances contained in the detergents.

It also ensures the absence of fumes after opening. Our steam recovery system needs to be connected to the cold water and not to the hot water produced by external heat sources. The cold water sent into the condensing device allows the steam generated by the rinsing cycle to be absorbed and eliminated quickly. This exchange allows an average heat rise of about 16°C to be recovered from the mains water and sent directly to the boiler, with annual electricity savings of up to 825,00 €.

steam recovery system

steam recovery system

The steam recovery system guarantee a considerable saving in operating costs.

Kw saved per cycle	0,105	x
Cycles/h	50	x
Daily working hours	5	x
Working days in a year	300	x
Electrical energy cost per KW	0,22	=

TOTAL 825,00 €/year

attention to details

7

Both hood and undercounter dishwashers are made with attention to the smallest details to guarantee the best performances, ergonomics, cleanliness and the lowest consumption of their category.
