the target

How the name suggests, the products of the WINE BAR line have been specifically designed for bars, pubs, wine bars and small bistros.

The taste and aroma of drinks, and wine in particular, owes much to the glass in which it is contained and praised, the cleanliness of the glass, which enhances the flavor as well as the scent and color.

The WINE BAR products line rely on expert technological research that helps maximize customer satisfaction, **leaving to you only the pleasure of pouring.**

Thanks to the innovative **DRYING SYSTEM (D.S.)** with fan belt baskets and integrated **REVERSE OSMOSIS SYSTEM (R.O.S.)** capable of providing excellent water quality, the glass washer of the WINE BAR line ensures thorough cleaning and excellent drying. The line is equipped with the **STEAM RECOVERY SYSTEM (S.R.S.)**, which completely eliminates the steam created during the wash cycle and rinse cycle, contributing significantly to raise the working environment health standards. Tank, cell and molded wash arms give the product outstanding hygiene and cleanliness.

steam recovery system 

WB

Glasswasher dim. 60x60x82, max. 800 glasses/h, double-walled, molded tank, deep drawn rails, independent stainless steel wash and rinse arms, atmospheric boiler, air-gap, thermostop, configurable electronics, drain pump, rinse pump, rinse aid and detergent dispenser.

Equipped with the following systems:

- integrated reverse osmosis system (R.O.S.)
- steam recovery system (S.R.S.)
- glass drying system (D.S.)

drying system

THE DRYING SYSTEM (D.S.) greatly reduces labor time. When the drying cycle has finished simply take the basket out and put the glassware away - **there is no need for it to be dried with a cloth.**

osmosis

Thanks to the **REVERSE OSMOSIS SYSTEM (R.O.S.)**, the glasses are perfect without blemishes or stains due to water quality. Please note that the osmosis system is integrated in the machine, thus eliminating the problem of space in premises prevalently occupied by the furniture or rooms dedicated to other services. The integrated reverse osmosis system also allows a reduced consumption of detergent compared to common water treatment systems and drastically reduces the technical assistance, maintaining the heating elements always clean.

steam recovery system

THE STEAM RECOVERY SYSTEM (S.R.S.) at the end of the wash cycle keeps the workplace healthy and prevents the operator from continuously breathing the substances contained in the detergents. It also ensures the absence of fumes after opening. Our steam recovery system needs to be **connected to the cold water and not to the hot water** produced by external heat sources. The cold water sent into the condensing device allows the steam generated by the rinsing cycle to be absorbed and eliminated quickly. This exchange allows an average heat rise of about 16°C to be recovered from the mains water and sent directly to the boiler, with annual electricity savings of up to **330,00 €**.

The baskets supplied with the glasswashers of the WINE BAR line are one of the most innovative aspects of this product. In fact, they are equipped with special ventilation holes that convey the hot air recovered under the glasses at the end of the wash cycle. This guarantees perfect drying that, combined with reverse osmosis system, ensures shiny and streak-free glasses.

But there's more!

Starting today, WINE BAR commercial glasswashers also allow to wash the dishes with new baskets specifically designed to be more and more versatile. This way, you'll also have shiny and perfectly dry dishes after each washing.

steam recovery system

The systems guarantee a considerable saving in operating costs.

Kw saved per cycle	0.050	x
Cycles/h	20	x
Daily working hours	8	x
Working days in a year	300	x
Electrical energy cost per KW	0.22	=

TOTAL 528,00 €/year

drying system

Cost for drying 1 glass	0.05
Cost for drying 1 basket with 20 glasses	1.00
Cost for drying 10 baskets with 20 glasses	10.00

TOTAL 3,000.00 €/year*

*for a basket with 50 glasses, the total savings estimated for 300 working days are € 6,750.00/year
